

FIRE. FORM. FUNCTION.

*Only those passionate about what they do
can set fire to others and get something
great off the ground. And fire - because
with höfats everything is about fire.*

*Nobody is interested in function without a beautiful
form. But it is not only about a beautiful form - it
is the right one. The right form corresponds with
function, is derived from it, can be explained by its
functionality, is purist and nevertheless unique,
not interchangeable - it is the best form.*

*We are striving for fascinating functionality.
höfats products go astonishingly intuitive and
mostly do not only fulfil one function but surprise
with their multi-functionality and enthuse with
their cunning application of physical effects.
These functionalities often are unparalleled and
- in order to keep it that way - patented.*

höfats GmbH is a young design company from the Allgäu region that develops and sells fascinating products on the subject of open fires - in other words, höfats brings fire into your life. You and your best friends, gathered around a crackling fire. Is there anything more beautiful? These unforgettable fire stories are our motivation and for this purpose höfats designs, invents, optimizes and produces beautiful, innovative and unique products. Our range of products includes table fires, fire baskets, fire bowls, grills, lanterns, torches and in the future many other products that make the time around the fire the best time of your life.

Our products combine puristic design and inspiring functionality. In the past five years we have won over 50 international design awards, including the most renowned in the industry. The Wirtschafts Woche titled an article about höfats „Functional design meets love of detail“.

SPIN

SPIN

STAINLESS
STEEL

BOROSILICATE
GLASS

500 % BOOST
high flame

indoor & outdoor

radiates heat

safe stand, safe
fuel (bioethanol)

SPIN TABLE FIRE – the impressive dance of the flames is due to bioethanol burnt in a can. Simply place the can into the stainless-steel footing on an even surface and light the combustion gel with an extended universal lighter or a long match. Then quickly put on the 54 cm high glass cylinder (made of high-quality borosilicate glass) and enjoy the luminous vortex of flames for 60 minutes [SPIN 90] to 80 minutes [SPIN 120]. Those who want to end the spectacle prematurely simply need to place the enclosed extinguishing lid onto the glass cylinder, thus suffocating the flame within seconds.

- ☆ • table fire, lantern, garden torch
- 500% boost due to rotating flame and chimney effect
- for indoor* and outdoor* use [* only spin standard]
- compliant with din en 16647
- incl. refill cup & extinguishing lid
- combustion period with one filling: 60 minutes (SPIN 90) to 80 minutes (SPIN 120)
- stainless steel housing
- combustible not included in delivery
- optional accessories: increasing element, ground spike, bioethanol can

SPIN TORCH – as a torch variant, SPIN can be easily fixed in the ground. Stuck into the lawn, the SPIN torch enchants all your guests during the next garden party and will be the eye-catcher of the evening. Different heights can be adjusted and realized due to the 4-piece ground spike included in delivery. The individual parts of the spike are differing in length (7 + 34 + 48 cm) and have an additional earth nail, thus guaranteeing a stable support.

- ☆ • use as a garden torch
- to be fixed in the ground (with earth nail)
- simple screw assembly without any tools
- stainless steel
- for outdoor use only

📦 SPIN 120 Torch silver Glass Tube: Ø 12 cm, 174 cm height (mounted), 1,9 kg gross 21 × 20 × 69 cm, 2,9 kg Art-No 00017, EAN 4064251000178

SPIN GROUND SPIKE – By means of the ground spike as an accessory, SPIN can be easily fixed in the ground. Stuck into the lawn, the SPIN torch enchants all your guests during the next garden party and will be the eye-catcher of the evening. The individual parts of the spike are differing in length (7 + 34 + 48 cm) and have an additional earth nail, thus guaranteeing a stable support.

- ☆ • enables use as a garden torch
- is simply pinched into the ground – outdoor use only
- simple screwing assembly without any tool
- is screwed onto the bottom of the wing body

📦 SPIN Ground spike silver Ø 1,5 cm, 121,5 cm length, 0,39 kg gross 49 × 5,5 × 2 cm, 0,5 kg Art-No 00002, EAN 4064251000024	
SPIN Ground spike oak Ø 2 cm, 124 cm length, 0,45 kg gross 50 × 5 × 4,5 cm, 0,51 kg Art-No 00003, EAN 4064251000031	

SPIN BASE – By means of this accessory, the garden torch turns into a table fire and brings campfire atmosphere onto your balcony, terrace or even into your living room. If the torch (with ground spike) shall be free-standing, this massive stand is assembled. The torch variant can thus be placed on solid underground, e.g. on the terrace.

- ☆ • enables the use of the garden torch as a table fire
- enables the use of the garden torch on solid, even underground such as stone, wood, metal by using the ground spike (without earth nail) – for outdoor use only!

📦 SPIN 120 Base silver Ø 23 cm, 1,5 cm height, 2,78 kg gross 23,5 × 23,5 × 2 cm, 2,85 kg Art-No 00007, EAN 4064251000079	
SPIN 90 Base silver Ø 19 cm, 1 cm height, 1,87 kg brutto 19,5 × 19,5 × 1,5 cm, 1,92 kg Art-No 00028, EAN 4064251000284	

SPIN REFILL CUP – The economic and sustainable solution for refilling SPIN: a stainless steel cup which can be refilled again and again with the high-quality höfats combustion gel out of the refill bottle.

- ☆ • sustainable and economic refill solution
- for use of the 1 liter bioethanol refill bottle
- easy handling
- capacity: 225 ml (SPIN 90), 500 ml (SPIN 120)

📦 SPIN 120 Refill cup Ø 8,5 cm, 9,5 cm height, 0,13 kg gross 9 × 9 × 10 cm, 0,16 kg Art-No 00023, EAN 4064251000239	
SPIN 90 Refill cup Ø 6,5 cm, 7,5 cm height, 0,07 kg gross 7 × 7 × 8 cm, 0,1 kg Art-No 00045, EAN 4064251000451	

BIOETHANOL – The combustion gel of thickened alcohol is made of renewable raw materials, thus burning in a CO²-neutral way and almost completely smoke- and odour-free. 2 packaging sizes (500 ml steel can resp. 1 liter refill bottle) for use with the stainless steel refill cup.

- ☆ • safe, natural, sustainable, odourless and smokeless fuel
- 1 l refill bottle, for use with the stainless steel refill cup.
- burning period approx. 60 minutes (SPIN 90) to 80 minutes (SPIN 120)
- safety combustion gel according to EG Regulation N° 1907/2006 (REACH)

📦 BIOETHANOL Firegel bottle Ø 7,5 cm, 26 cm height, 1 kg gross Ø 7,5 cm, 26 cm height, 1 kg Art-No 090801, EAN 4260447331099

protected from the elements

GRAVITY CANDLE – The höfats lantern delights with a cardanically suspended candle – no matter in which direction the lantern is twisted, the candle always remains perpendicular due to gravity. Wax splashes when blowing out a candle are a thing of the past – the GRAVITY CANDLE simply is turned around and extinguishes. Already when lighting the candle, the mechanism is extremely useful – slightly tilt the lantern to the side and light the candle without burning yourself or having to remove the glass tube.

Be it on the table, in hanging position (thanks to accessories) or on a rod – the GRAVITY CANDLE with its atmospheric candlelight turns your favourite spot into a magical place both indoors and outdoors. You can subsequently extinguish the GRAVITY CANDLE in any position by simply turning it around – and what is best: in reverse position, the GRAVITY CANDLE is perfectly protected against the weather for neither rain nor leaves can reach its interior.

- lantern with a special (cardanically) pivoted candle
- candle always remaining perpendicular due to gravity
- comfortable lighting
- safe and secure extinguishing of the flame
- protected against leaves, water and dust in reverse position
- optional accessories: suspension, foot stand, pole

3 ways to use

GRAVITY CANDLE HANGER – thanks to the optional hanging solution, the GRAVITY CANDLE can be hung up as well. The assembly is incredibly simple: pull off the glass tube, plug on the ring together with the bracket and put on the glass tube again. Also in this position, the lantern can be easily turned around, extinguishes and is protected against the weather.

- lantern hanging solution
- incl. additional hanging rope (200 mm)
- hanging up also possible without rope, e.g. with a nail
- stainless steel, brushed

Ø 8 cm, 17 cm height, 0,1 kg | gross 18×10×3 cm, 0,1 kg
Art-No 080201, EAN 4260447330597, HS Code 73269098

GRAVITY CANDLE POLE – by means of this pole, the GRAVITY CANDLE can be placed everywhere in the garden, even in a flowerpot. The GRAVITY CANDLE simply is placed on the bowl of the pole and can be easily turned around, extinguishes and is protected against the weather also in this position.

- secure stand
- massive stainless steel, brushed
- extensible due to foot stand to a free-standing lamp
- 6 elements: 4 x 30 cm poles + bowl + head (useable as earthing)

120 cm height, 0,5 kg | gross 32×8×4 cm, 0,5 kg
Art-No 080301, EAN 4260447330603, HS Code 73269098

GRAVITY CANDLE FOOT – if the pole shall be free-standing, this massive base plate is mounted.

- foot stand for the GRAVITY CANDLE pole
- massive stainless steel, polished
- secure stand

Ø 16,5 cm, 8 mm thickness, 1,4 kg | gross 20×20×2 cm, 1,4 kg

STEEL

ENAMELLED/
POWDER COATED

fire bowl

barbecue

plancha

foldable

elevated

BOWL – fire in its most accomplished form with fascinating multi-functionality: be it a casual lounge or a relaxed cocktail party – BOWL can be used in two completely different heights and flexibly adapts to its respective purpose. The enamelled steel hemisphere with its clarity of shape seems to float. In both positions, BOWL can be placed upright or pointing in one direction, thus shielding the flames from wind and reflecting the accruing heat effectively forwards. In its neutral position, BOWL turns into an ideal cooking and grilling zone due to its cooking grid and cast plate.

The removable brazier in the interior of the hemisphere protects the underground from too much heat, enables an ideal oxygen supply of the fire and makes cleaning easy and comfortable. Both stand variants are made of high-quality stainless steel and always remain stable on three standing legs.

BOWL WIREBASE – This elegant, massive and nevertheless light foot for lower use of BOWL (available as accessory) guarantees stable standing and enables the hemisphere to be pivoted in any position desired. The fire can thus be protected from too much wind.

BOWL TRIPOD – Due to its patented connection piece, this tripod is foldable and nevertheless stable in higher position, bringing BOWL to grilling operation height. The hemisphere can be freely pivoted, thus being an elevated fire bowl.

BOWL GRID – The cooking grid consisting of two parts makes possible grilling on a spacious surface and is combinable with the Bowl Plancha if one part is left off. Simple handling and cleaning in the dishwasher possible.

BOWL PLANCHA – Cooking on a plate heated by fire – a tradition thousands of years old, worldwide, in most different cultural areas and societies. In Spain, it developed into the Plancha, the Japanese call it Teppanyaki. There is a myriad of varieties of dishes which can be cooked or grilled on a hot plate – as there are no bounds to your creativity.

BOWL COVER – In order to protect BOWL perfectly for transport and stowage, we developed a covering hood. The waterproof material shields it from dirt, moisture and scratches.

safe & clean clean-up

CUBE BLACK – Everyone knows the atmospheric charm of an open fire – but how to extinguish the fire subsequently, above all the upcoming wind and increasingly flying sparks? CUBE is simply turned around, the fire bowl remaining always in balance due to gravity, the fire is suppressed and extinguished. If no fire is burning inside CUBE, it can be used as a stool, a bench or a side table – a multi-purpose piece of outdoor furniture which surprises, enthuses and gives lasting pleasure due to its solid materiality.

CUBE RUSTY – The visual alternative for the black CUBE. This model handles the usual functionality with this one of a kind finishing. Weather conditions will give rise to an unique and custome-made rusty patina over the CUBE surface.

CUBE COVER – fits like a tailor-made suit. In order to protect CUBE perfectly for transport and stowage, we developed a covering hood. The waterproof material shields it from dirt, moisture and scratches.

CUBE BOARD – By the use of the solid bamboo board, CUBE is easily transformed into a seat, a side table or a stool. Due to its extremely high surface hardness bamboo is one of the most durable timbers. To make even more long lasting the board is varnished. Only use after CUBE is totally cooled down.

CUBE GRID – By the use of the Stainless Steel grid, CUBE can be grilled on. The grid can be adjustable in height and regulated in heat according to the breakouts.

CUBE PLANCHA – the massive, enameled cast iron plate turns CUBE into the Plancha grill. The plate can be adjusted in height – and thus is heat controllable – according to the raster of the notches. Ideal for prawns, shrimps, small calamari, sliced courgettes or a mix of vegetables. Apart from the smooth Plancha surface, the CUBE cast plate has a fluted side on which every steak gets its perfect branding. Two plates find place in CUBE, if necessary on different heights.

TRIPLE 120 | 90 | 65

**CORTEN
STEEL**

DELIVERY
CONDITION BRIGHT

demountable,
compact transport
dimensions

optional (TRIPLE 90):
feet for a higher position

TRIPLE – a tribute to open fireplaces – the most original form of heat and cosiness. Designed in edged clarity and made of massive corten steel, the fire bowl series TRIPLE cultivates the archaic heat source through simple and thrilling functionality.

With a few steps only, three identical segments – neverthe-less faceted in themselves – complete each other to form one solid, larger whole. Mobility and a resource-saving transport arise from its separability.

The adaptable cooking grate can be continuously adjusted in height and is rotatable. On its surface, a teapot, mulled wine or grillables find place. It can moreover be rotated inwards in order to cook a spicy stew.

TRIPLE GRID – the adaptable cooking grate can be continuously adjusted in height and is rotatable. A vertical pole serves as a guide along which the cooking grate can be vertically adjusted by 45 cm. Due to tilting, it is self-holding in any height.

TRIPLE TABLE – on the surface, a teapot, mulled wine or grillables find place. It can moreover be rotated inwards in order to cook a spicy stew.

TRIPLE POLE – if the TRIPLE TABLE shall not be mounted on the vertical guide pole of the cooking grate, the TRIPLE POLE serves as an alternative support.

TRIPLE 90 FEET – to bring TRIPLE 90 to a higher position, additional feet can be mounted. This is helpful in order to reach a more ergonomic grilling height or to protect the ground from too much heat. If the stands are not needed, they can be easily rotated inwards.

- ☆ • fireplace and grill
- variably height-adjustable and pivoted coal grid (optional accessory)
- work surface resp. height-adjustable hot plate (optional accessory)
- up to three supplementary rods can be mounted (TRIPLE 120 / 90)
- easy to disassemble, compact transport dimensions
- corten steel – developing a living, unique rust patina
- higher stand due to supplementary foot stands (optional accessory TRIPLE 90)

BEER BOX

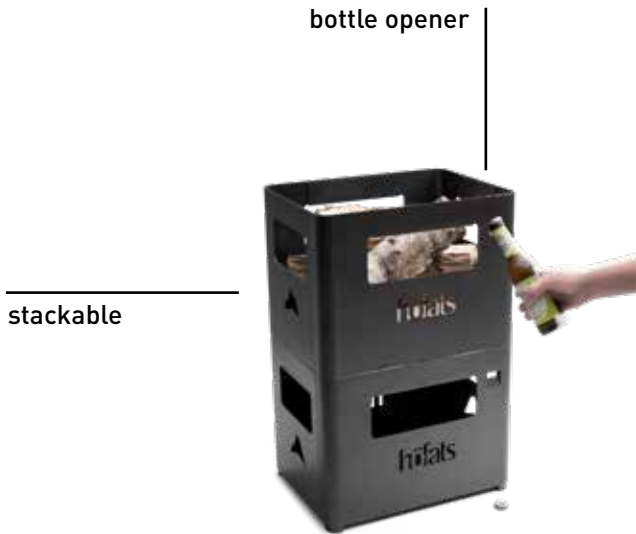

BEER BOX

CORTEN
STEEL

DELIVERY
CONDITION BRIGHT

BEER BOX – the evolution of the beverage crate starts with the materials wood and metal and finds a preliminary end – for economic reasons – with plastics. But economic efficiency is relative – what if there is a life after the existence as a beverage container, if the crate is upcycled to a fire basket after its initial use. BEER BOX, a fire basket made of solid corten steel in its simplest form, however amazingly versatile. The large handles cry out for mobility – thus off you go to the lake. The interior of the cardboard box serves as a firelighter at the same time. Thanks to accessories, the crate turns into a grill or stool and its stackability enables a raising of the fire basket respectively grill and also makes sense in terms of storage and transport. The fact that the crate moreover is an ideal advertising medium is in the nature of things and the integrated bottle opener is a pure pleasure! Cheers, we wish wonderful evenings with a beer and a fire and your friends around.

- beverage crate, fire basket, grill and stool in one
- integrated bottle opener
- incl. inlay for 0,33 l bottles
- corten steel – developing a living, unique rust patina
- optional accessories: coal grid, seat board / serving tray
- stackable on another BEER BOX or a customary beverage crate

barbecue & fire basket

CRATE – The name says it all and so much more: CRATE follows in the footsteps of the legendary BEER BOX. While a beer crate was the source of inspiration for its little sister, CRATE resembles a wine case or a fruit box. We traded the commonly used wood for highquality Corten steel. Thus a multi-functional product was born which serves many purposes: firewood storage, wine case, beer crate, fruit box, but also fire basket, stool and barbecue.

How about a spontaneous trip to the lake? CRATE is your perfect companion! Take along your firewood for an atmospheric campfire or a small barbecue as well as your drinks in this sturdy box.

- ☆ • fire basket, grill and stool in one
- also useable for beverages, as wine case, beer crate, wood storage, fruit box etc.
- corten steel developing a unique, living patina
- long-lasting stainless steel riveting
- optional accessories: cooking grid, supporting board
- stackable on / in combination with other crates

📏 40×30×27 cm, 6,6 kg | gross 42×42×30 cm, 8,8 kg
Art-No 120101, EAN 4260447330863

CRATE BOARD – As an accessory, a supporting board made of bamboo wood is available, turning CRATE in one simple step into a stool or side table.

- ☆ • turns the fire basket into a stool or side table
- massive bamboo wood, 15 mm thick, uv-resistant, varnished
- can be used as serving tray

fire bowl & barbecue

safe & clean clean-up

protected from the elements

optional expandable

ELLIPSE – a sculptural fire bowl made of corten steel, surprises with unexpected functionality. If placed in the centre of attention, it can take a neutral position, however also turn towards a seating area respectively protect the flames from too much wind. Its stand provides for stability and is, at the same time, the mounting of the rounded bowl.

It moreover serves as an ash container: if the fire has nearly burnt down and shall be extinguished completely, the bowl can be taken with gloves and emptied into the stand. This is subsequently covered with the empty fire bowl in upside-down position, thus choking and extinguishing the residual fire.

- ☆ • fire bowl with grilling facility
- extinguish in a safe and clean manner: embers can be emptied into the stand, the fire bowl serving as a closure
- pivoted fire bowl: neutral position and/or facing position
- corten steel – developing a living, unique rust patina
- optional accessories: coal grid, foot for a higher stand

✂ archiproducts design award 2018

Art-No 060101, EAN 4260447330528, HS Code 73218900

ELLIPSE GRID – due to the massive Stainless Steel cooking grate, ELLIPSE also serves as a grill. The heat can be increased by placing more embers under the cooking grate respectively reduced by pushing the embers aside.

- ☆ • grid with Ø 6 mm rods
- grid is simply mounted at the side, no further assembly necessary
- polished stainless steel
- heat regulation through shifting the embers

📏 60×40×7 cm, 3 kg | gross 60×40×7 cm, 3 kg
Art-No 060301, EAN 4260447330535, HS Code 73219000

ELLIPSE FOOT – to bring ELLIPSE into a higher position, the foot can be mounted on an additional stand element. This is helpful in order to reach a more ergonomic grilling height or to protect the ground from too much heat. Up to two feet elements are expedient.

- ☆ • additional foot for a higher stand
- fire bowl can thus be raised by 18 cm
- easy plug-in assembly
- maximum use of two foot elements only

📏 Ø 35 cm, 18 cm height, 4,6 kg | gross 36×36×22 cm, 6,3 kg

CONE

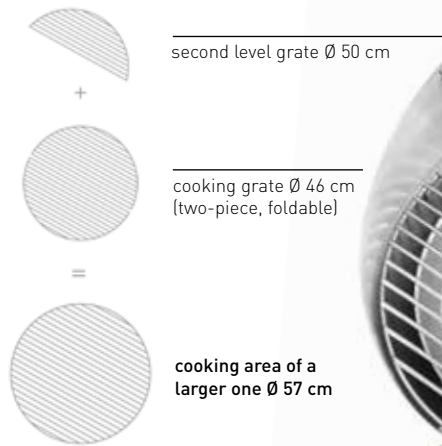

CONE

STAINLESS
STEEL

POWDER COATED

ergonomic working
height of 85 cm

100 % stainless steel

With fully or half closed cover,
indirect grilling is possible in
all positions.

continuous and efficient heat management

The distance between charcoal and food is
minimal, the air supply is maximal
= maximum heat.

The distance between charcoal and food is
normal, the air supply is open
= middle heat.

The distance between charcoal and food is
maximal, the air supply is closed
= minimum heat.

fire basket function

CONE – is the worldwide first charcoal grill where you can adjust the heat directly. It thus translates the comfort of a gas grill to a charcoal grill – with real embers, real fire and a real atmosphere. The immediate, direct and intuitive heat regulation is made possible by the principle of combining the distance of the heat source to the grillables with the air supply. In case high heat is required, e.g. for sealing in the juices of the meat, the coal grid and thus the heat source can be simply lifted. To reduce heat, just lower the coal grid and thereby the air supply will automatically decrease.

CONE COVER – fits like a tailored suit. In order to protect CONE optimally, we have developed a covering hood. The waterproof material in combination with a high-tech zip protect form dirt and moisture. The hood covers CONE like a second skin and protects your grill even when it is sent to winter sleep in autumn. Due to the integrated carrying handles, CONE can be transported comfortably.

CONE BOARD – Shelf space is always useful by grilling – the cold drink is close at hand and the grillables wait right beside the bbq grid to be cooked. The board is attached with one move – as well as removed. The outstanding surface hardness makes bamboo one of the most durable timbers. Furthermore bamboo contains a natural antibacterium, making it perfect for the use as a cutting board.

CONE HEALTH GRID isn't just another cast iron grid. The dripping plate which has specially been designed for the extremely massive grid makes charcoal grilling as healthy as never before – it ensures that no fat or marinade can drop into the embers and that the grillables can nevertheless take on the wooden and smoky aroma of the charcoal. The two-piece cast iron grid has a dripping plate and can also be folded as the cooking grate of CONE.

CONE MOUNTING – the Mounting kit allows to mount CONE to all worktops. For all those, who are into an outdoor-kitchen, CONE Mounting offers the perfect solution. It can be set in timber, concrete or even a flagstone, with CONE Mounting your creativity has no boundaries.

The table is not included in the purchased package.

- ☆ • direct heat regulation

TOOLS

STEAKTOOLS – tools meeting the demands of a perfect piece of meat. Due to the sharp blade, the meat fibres are not torn apart, but precisely cut. The meat thus remains juicy and aromatic. Forged in one solid piece, the brushed, silk-matt Stainless Steel lies perfectly balanced in your hand. Non-corrosive, dishwasher-safe and dimensionally stable, the höfats steaktools are indestructible and guarantee longstanding joy in good meat. Delivered in a high-quality wooden box, höfats steaktools are the perfect present for every meat lover and for all appreciative of good food. By the way – the höfats steaktools also perform extremely well with pizza.

TONGS – Due to their asymmetric shape, the tongs lie ergonomically and safely in your hand. Moreover, the slightly tilted edges enable to cautiously handle sensitive grillables. Breakouts at the ends provide for grip and clear view – in a way, they make the tongs transparent at the center of events. The tongs are thus the perfect tool both for small shrimps and T-bone steaks. And if that wasn’t enough, the tongs place the cooking grid over the embers or lift the hot grid out of the grill.

APRON – The ingenious höfats apron turns you and your grilling cooking skills into a successful “rope team”. The robust and easy-care material suits you down to the ground. Due to the continuous rope stretching from the neck over the sides to the hip, the apron can be adjusted to the body size with a flick of the wrist. Thus it fits perfectly and provides the maximum wearing comfort. The decently integrated pocket as well as the towel belt will thrill you. The belt is already adequately equipped with a high-quality towel made of 100% linen going along with the höfats apron.

BBQ STARTER – höfats chimney starter can be used like a normal one, but also according to the hö-fats ignition principle. With the hö-fats ignition principle, the chimney starter does not have to be turned around, but only pulled upwards. There are no flying sparks or ashes. The höfats lighting solution is therefore much safer and comfortable compared to conventional chimney starters.

GLOVES – The robust höfats grilling gloves made of pure, extremely dense suede and Kevlar are hand-sewn and made for eternity. The gloves are highly heat-resistant, thus turning grilling into an absolutely safe pleasure. Smooth leather and a perfect fit make the gloves extremely handy. You will fall in love with the impeccably sewn and thus highly comfortable inner lining.

PREMIUM FIREWOOD – Our premium firewood is high-quality hardwood from Biomassehof Allgäu. Technical drying is used to achieve a quality that is almost free of weathering and a guaranteed water content of less than 20 percent. Smoke-free fire enjoyment with our fire baskets and perfect grilling over an open fire with a matching plancha.

JOHNNY CATCH – probably the world’s most functional and minimalistic wall mounted bottle opener. Johnny Catch has a thin, sleek design and fits to the wall or mounting surface discretely. Johnny Catch magnet or with a cup captures bottle caps before they have a chance to fall on the floor! Johnny Catch is 100% Stainless Steel and doesn’t need any screws or additional fixings. It is simply mounted on the wall by high quality double-faced tape that adheres to many surfaces, even unewen ones!

Johnny Catch is a must-have for everyone: from lemonade to craft beer lovers; whether it is placed in a bar or nightclub, domestic kitchen or man cave, just next to your barbecue or fridge, where there is a drink that needs uncapping, Johnny Catch will keep on catching... Cheers!

CORTEN STEEL

LIVING PATINA

Unlike conventional steel, Corten steel forms a solid layer of patina. Whereas normal steel tends to gradually dissolve due to corrosion, Corten steel develops a barrier coat under the actual layer of rust which protects the component from furthermore corroding. The covering layer continuously forms anew and thus provides for a living and unique patina.

This weather-resistant steel can be classified an extremely ecological material. It has above-average durability, does not need varnishing and is completely recyclable. Corten steel is increasingly used in modern architecture façade engineering.

STAINLESS STEEL

DURABLE QUALITY

It is approximately four to five times more expensive than normal steel, however resistant to corrosion. This special feature is due to a simple chemical reaction: through the chromium content of the steel and in combination with the oxygen in the air (or also in water), a very thin passive layer forms on its surface. This layer repels all aggressive substances. And even if the layer gets damaged under external influence, it forms anew within split seconds from the inherent steel matrix. Stainless steel – an uncompromising material matching perfectly with the höfats quality demands.

A widespread misbelief has it that high-quality stainless steel is not magnetic. Until some years ago, this false rule of thumb was still deemed to be valid – but in the meantime, ferritic (i.e. magnetic) stainless steel of highest quality is available, disposing of the same excellent corrosion resistance as its austenitic predecessors.

OUR PRODUCTS WITH YOUR LOGO

Our höfats products make the sparks fly – they fascinate due to puristic design, uncompromising workmanship and fascinating functionality – objects people are talking about, objects never being forgotten and wanting to be possessed. Ideal presents for your employees or clients.

By means of a laser engraving, your personal individualization will remain forever.

Thats what the Wirtschaftswoche wrote about höfats

An extract of magazines that reported about höfats:

With fire and passion, we create fascinating products made of uncompromising material – this is what höfats stands for – a fire story – our way to conceive and develop products, to create a unique identity through purist forms and fascinating function. Always bearing in mind perfection down to the very last detail in order to turn a strong idea into an authentic höfats product. A product made for incomparably beautiful moments – experience your very personal fire story now.
